PROFESSIONAL EXPERIENCE

Senior Engineer

Qualcomm

Nov 2021 - Present 📍 Hyderabad, India

- **GlitchHunt - Issue Categorization using Qgenie-SDK** Utilized Qwen2.5-14b-1m LLM with LangChain SDK and FAISS to semantically match error logs with historical JIRA/CRs, reducing analysis time by over 15 minutes per job; applied chain-of-thought prompting to prevent hallucinated classifications across TOOL/SW/INFRA categories; designed a fallback mechanism that embeds and indexes unknown issues for future recall with expert-incentivized labeling.
- **Spotlight - Intelligent Duplicate CR Detection** Implemented Sentence Transformers with cosine similarity to embed and retrieve semantically similar historical JIRA/CRs, eliminating duplicate reporting and streamlining ticket triage.
- **E2E Synchronization Framework** Designed and built a containerized framework using Flask API and MongoDB to automate end-to-end test case scenarios, enabling seamless synchronization.
- **APTCI Dashboard Deployment** Deployed updated Docker images with new features, ensuring efficient and scalable dashboard operation.
- **AdbUtility** Developed a Flask API to retrieve AdbId from Serial No. for MDM/XR/LA targets, providing multi-device support with minimal effort.
- **Automation POC** Automated QLI/XR/MBB functionality testing, achieving 100% automation and eliminating manual effort.

Software Developer

Ericsson India Global Services

Sept 2019 - Oct 2021 📍 Noida, India

- **Data Insights** Created automation scripts with pandas and matplotlib to generate actionable business insights.
- **Data Preprocessing** Built an XML parser leveraging multiprocessing to handle 160 GB/hour datasets; evaluated Vaex, Parquet, Avro, and Dask for optimal performance.
- **Rule-Based Automation Engine** Designed and deployed a scalable framework using design patterns, MongoDB, and Docker.
- **Infrastructure Setup** Configured Zookeeper, Prometheus, Grafana, Rclone, and NiFi cluster with Ansible to improve tooling and monitoring efficiency.
- **Big Data Pipeline** Engineered a high-throughput pipeline with Apache NiFi, Hadoop, and PySpark to process 300 GB of data every 15 minutes.
- **API Optimization** Reduced costs by 30% through data-flow optimization and Bloom filter integration for efficient Google Maps API usage.

Software Engineer Trainee

GadgEon Smart Systems Pvt Ltd.

Jun 2019 - Aug 2019 📍 Kochi, India

- **Data Analyst** Analyzed large-scale IoT data from medical and industrial automation domains, delivering data-driven insights that guided business decisions and product development.

TECHNICAL SKILLS

- LangChain, LangGraph, LangSmith, Sentence Transformers, FAISS, Cosine Similarity, LLMs (Qwen2.5-14b, LLaMA), Prompt Engineering, Chain-of-Thought Reasoning, Semantic Search, Vector Embeddings
- Pandas, Pyspark, Image Processing, Selenium
- Django, RESTful API, Flask
- RabbitMQ, Celery, Docker, Hadoop
- Python, SQL, MongoDB

HONORS & AWARDS

- Insta Orion Award, Qualcomm (2022)
- Ace Award, Ericsson (Jan 2021)
- Power Award, Ericsson (Oct 2020)
- Silver Medalist, IIIT Kottayam (Batch 2015)
- Rank 1, Interviewbit Contest (July 2018)

PROJECTS

InstaPageManager

- Fine-tuned LLaMA on Reddit comments to automatically generate memes, captions, and hashtags for Instagram; employed Hugging Face, PyTorch, PRAW, and custom preprocessing for data collection and model training.

Scene Description for Visually Impaired People

- Implemented object detection and distance estimation, then used Google Text-to-Speech to produce audio scene descriptions, enabling visually impaired users to visualize surroundings.

Cryptocurrency Live Twitter Sentiments

- Analyzed live Twitter feeds to plot sentiment trends over time; built a real-time visualization web app with Python, Dash, and NLP techniques.

CERTIFICATIONS

- Learning Docker - LinkedIn Learning
- Learning Git and GitHub - LinkedIn Learning
- Designing RESTful APIs - LinkedIn Learning
- Machine Learning by Andrew Ng - Coursera
- Introduction to Data Science - Cognitive Class
- Data Science Hands-On with Open Source Tools - Cognitive Class

EDUCATION

Btech (Hons.) - CSE

Indian Institute of Information Technology Kottayam

2015 - 2019 • CGPA: 9.41/10
