PROFESSIONAL EXPERIENCE

Senior Engineer

Qualcomm

Nov 2021 – Present

Hyderabad, India

- **GlitchHunt – Issue Categorization using Qgenie-SDK**
 - Used Qwen2.5-14b-1m LLM with LangChain SDK and FAISS to semantically match error logs with historical JIRA/CRs, reducing analysis time by 15+ minutes per job.
 - Applied chain-of-thought prompting to prevent hallucinated classifications across TOOL/SW/INFRA categories by avoiding mismatches with unrelated issues.
 - Designed a fallback mechanism to handle unknown issues by embedding and indexing them for future recall, with expert-incentivized labeling for accurate categorization.
- **Spotlight – Intelligent Duplicate CR Detection**
Implemented Sentence Transformers with cosine similarity to embed and retrieve semantically similar historical JIRA/CRs, avoiding duplicate reporting and streamlining ticket triage.
- **E2E Synchronization Framework:** Designed and implemented a containerized framework (FlaskAPI and MongoDB) for end-to-end test case scenarios, enabling seamless synchronization and automation.
- **APTCI Dashboard Deployment:** Successfully deployed new Docker images with updated features ensuring efficient and scalable deployment.
- **AdbUtility:** Developed a Flask API to retrieve AdbId from Serial No. for MDM/XR/LA targets, enabling multi-device support with minimal effort.
- **Automation POC:** Automated QLI/XR/MBB functionality testing, achieving 100% automation hence eliminating manual work.

Software Developer

Ericsson India Global Services

Sept 2019 – Oct 2021

Noida, India

- **Data Insights:** Developed automation scripts with pandas and matplotlib to drive business decisions.
- **Data Preprocessing:** Created an XML parser with Multiprocessing to handle 160 GB/hour datasets. Explored Vaex, Parquet, Avro, and Dask for optimal results.
- **Rule-Based Automation Engine:** Designed and deployed a scalable framework with Design Patterns, MongoDB, and Docker.
- **Infrastructure Setup:** Configured tools like Zookeeper, Prometheus, Grafana, Rclone, and Nifi Cluster with Ansible for efficient tooling and monitoring.
- **Big Data Pipeline:** Built a high-throughput data-pipeline with Apache Nifi, Hadoop, and Pyspark to handle 300 GB of data every 15 minutes.
- **API Optimization:** Reduced costs by 30% with data flow optimization and BloomFilters for efficient Google Map API usage.

Software Engineer Trainee

GadgEon Smart Systems Pvt Ltd.

Jun 2019 – Aug 2019

Kochi, India

- **Data Analyst:** Analyzed large-scale IoT data from Medical and Industrial Automation fields, driving business decisions and product development with data-driven insights.

TECHNICAL SKILLS

- LangChain, LangGraph, LangSmith, Sentence Transformers, FAISS, Cosine Similarity, LLMs (Qwen2.5-14b, LLaMA), Prompt Engineering, Chain-of-Thought Reasoning, Semantic Search, Vector Embeddings
- Pandas, Pyspark, Image Processing, Selenium
- Django, RESTful API, Flask, RabbitMQ, Celery, Docker, Hadoop
- Python, SQL, MongoDB

HONORS & AWARDS

- Insta Orion Award, Qualcomm (2022)
- Ace Award, Ericsson (Jan 2021)
- Power Award, Ericsson (Oct 2020)
- Silver Medalist, IIIT Kottayam (Batch 2015)
- Rank 1, Interviewbit Contest (July 2018)

PROJECTS

InstaPageManager

- Fine-tuned LLaMA on Reddit comments to auto-generate memes, captions, and hashtags for effortless Instagram content.
- Used Hugging Face, PyTorch, PRAW, and custom preprocessing for data collection and model training.

Scene Description for Visually Impaired People

- Using object detection, similarity to find distance and google text to speech to describe scene in front of person in audio format to make them visualize.
- Python, OpenCV, Image Processing

Cryptocurrency Live Twitter Sentiments

- Analyzing twitter feed and plotting sentiments against time. Used Dash for better plotting and Realtime Visualization in WebApp.
- Python, Dash, NLP

CERTIFICATIONS

- Learning Docker – LinkedIn Learning
- Learning Git and GitHub – LinkedIn Learning
- Designing RESTful APIs – LinkedIn Learning
- Machine Learning by Andrew Ng – Coursera
- Introduction to Data Science – Cognitive Cls
- Data Science Hands-On with Open Source Tools – Cognitive Class

EDUCATION

Btech (Hons.) – CSE

Indian Institute of Information Technology Kottayam

2015 – 2019

CGPA: 9.41/10
